TEXAS SETS EXAMPLE.

Down in Texas they have started a campaign the purpose of which is "Buy it in Texas" and "make it in Texas."

These ideas are expressed with sufficient clearness to make explanations unnecessary. They are the application to the state as a whole of the principles which should govern in the building of a town or community.

No doubt on many occasions in the midst of political campaigns the stump speaker in the Lone Star state has declared with great vehemence, "Texas is an empire in herself." (Loud applause.) We assume that the Texas spiclers have sprung this bit of bombast upon innocent and unsuspecting crowds because it is a kind of habit which orators in other states have.

Of course this statement of the orator contains only a modicum of truth. Texas has the possibilities of being an "empire within herself" but at the present writing those possibilities are far from being realized. What the commercial leaders of the state are attempting to do now is to make this potential empire the real thing and thereby they are setting an example which Oklahoma may well imitate.

We have in Oklahoma a state which is rich in natural resources and it is up to us to develop them. Our cotton need not be sent out of the state to be worked up into finished products. We ought to have cotton mills all over the state. The money that is paid out for labor to spin Oklahoma cotton in distant states, the profits of the spinners and middlemen and the cost of transportation two ways—all should go into building up the commercial and industrial interests of Oklahoma.

What has been said with reference to the cotton industry applies with equal force to other lines. Making things in Oklahoma will open a vast field of industry and no less promising is the program of buying it in Oklahoma. In the printing industry alone there is enough money sent out of the state annually to keep several thousand workmen busy the year around in Oklahoma.

It is said that the Lord helps those who help themselves. Oklahoma must learn to help herself and one of the best ways to go about this is for us to begin to help each other. Instead of throwing in with the fellows who are making and selling things in other states, we should patronize the merchants and manufacturers of Oklahoma.

THE INTELLECTUAL LIFE.

You can lead the intellectual life; even you. No matter who you are or where you are placed, you can make your mind a thing of joy. You may

Compare Camels

with any cigarette at any price! You get the flavor of the delightful blend of choice Turkish and choice Domestic tobaccos. It's more pleasing than either kind smoked straight.

Camel Cigarettes

Turkish and Domestic Blend

are smooth and fragrant. They won't bite your tongue and won't parch your throat and leave no unpleasant cigarette after-taste.

Camels sell 20 for 10c. Owing to the cost of the choice tobaccos blended in Camels, do not look for premiums or coupons.

If your dealer can't supply you, send 10c for one package or \$1.00 for a carton of ten packages (200 cigarettes), sent postage prepaid. If after smoking one package you are not delighted with CAMELS, return the other nine packages and we will refund your dollar and postage.

be a farmer boy or a busy working girl or a burdened housewife, a storekeeper; it makes no difference; the door of the intellectual life is open before you; enter if you will.

First of all let us get at some practical ways and means, for that is what we all want most to know. There are some plain rules to which we ought to attend; in the neglect or ignorance of them we fall into despair.

At the head of the list of vital things to believe in comes Self. You must have and doggedly cling to your self-confidence. Do not despise your own mind. It may not be as bright as this man's or as retentive as that man's; but it is your own. It is precisely adapted to your personality. It may not be the best mind in the world, but the best for you.

You are not to cultivate your mind so as to excel some one else, to know more and to be more than others but for your own satisfaction.—Dr. Frank Crane in the Woman's World for May.

BEAUTIFYING THE LAWN.

We print today the first of a series of three articles on lawn improvement. These articles were prepared by experts of the department of agriculture and should be of value. They give pointers on keeping up and making the lawn beautiful. It requires time and much patient effort to have a pretty yard. Many of the people of Chickasha have accomplished splendid results in this line and it is to be hoped that others will catch the enthusiasm before the summer is over. There has never been a better season for getting a good stand of grass on the yards and parking and we ought to improve our opportunities.

Oklahoma has a full-grown school row on her hands. At this distance it looks like some school politicians who have axes to grind have worked up

the people into a frame of mind which makes them perfectly willing to play their game. That the schools of the city must suffer as a result of the mess that has been stirred up is not open to question. The people of Oklahoma City and every other town will do well to elect the right kind of men as members of the board of education and then let them run the schools.

Now don't forget the annual banquet of the Commercial and Farm bureau this evening. It is to be a fine feed and it will be a good time for a general getting together of the citizens of Chickasha. Let's take on some of the old-fashion pop and generate a fresh supply of community enthusiasm.

EXPRESS PACKAGES.

Behold the weeds, how fine they grow.

At that, I do not mean to blow. But merely would suggest, Friend Si, if you don't cut 'em they'll get high.

The reason why a woman is right is because she thinks so.

In spite of the frequent showers, the June bride crop hereabouts is becoming more promising.

A Boston paper has some doubts as to whether Teddy Roosevelt ever will get used to not being president.

Si Simp says he notices that we always have lots of wet weather when it keeps raining for a long long time pretzel.

But so far we have not heard anybody complain because their 'frail boles have not been in more general use this season.

As we understand it, every woman considers it her religious duty to tell the men of the house to keep the flies out every time the door is opened.

In spite of her repeatedly announced readiness to fight, Romania remains on the fence. On the whole it is hard to see how she is losing anything by keeping out of it.

Being somewhat of an expert linguist, Judge Davenport observes that all of England's ships will be submarines if the Germans keep on sending them to the bottom of the sea.

As a matter of news it may be stated that in Oklahoma Overcoats are worn in June. "Cool Colorado" hasn't a thing on this great country of ours. P. S. We always get off this boast before the sizzling days drive up.

Now comes a distinguished doctor with the information that he isn't sure that tooth brushes don't do more harm than good. If a few more time-honored institutions like that are knocked over, we may be persuaded to abandon our regular Saturday night bath.

JUST A THOUGHT

HERE THE DAY IS GONE.

Sorrows are often like clouds, which, though black when they are passing over, when they are past become as if they were the garments of God thrown off in purple and gold along the sky.—Henry Ward Beecher.

Obliging.
Dear Old Lady (with a view to a little moral teaching)—Now, do either of you little boys say naughty words? Elder Brother—Hell, mum. I ain't much of a 'and at it myself, but young Bill here is a treat. Cuss fer the lady, Bill.—Butterfly.

IMPROVING THE LAWN

(First in series of three articles on Care of Growing Lawns.)

Washington, June 8.—The improvement of an old lawn is very much more difficult than establishing a new one. In many cases it is impracticable to attempt improvement of an old lawn that is in bad condition, says the specialists of the U. S. department of agriculture. However, if a reasonably good turf obtains it is possible to better it materially by re-seeding, fertilizing, water. In the majority of cases improvement is desired in the spring, since at this season many bare spots

All Babies Destined to Great Achievement

To be born is to be great. For there are possibilities in every tiny human infant. And for this reason every one should remember that whatever is done to aid the mother, to relieve her of distresses during her trying months, will surely be of marked benefit to the child.

Among the sterling aids is a splendid external remedy known as "Mother's Friend." It is what is called an embrocation. It is applied to the abdominal muscles, gently rubbed in by your own hand, guided by your own mind. It makes the muscles pliant, they expand quite naturally and the effect upon the nerves is such that they adjust themselves to the process of expansion so that pain from this source is almost eliminated. Women who use "Mother's Friend" are relieved of a great many minor distresses, all apprehension disappears and those peculiar nervous "spells" no longer disturb the nights. It is well named "Mother's Friend." Get a bottle today of any drug list. Then at once write for a most interesting and instructive book for all prospective mothers. Address: Bradford's Regulator Co., 785 Lamar Bldg., Atlanta, Ga.

This book explains the physical action of "Mother's Friend," tells why it enforces strength to the muscles and relieves undue strain. It also contains letters of experience from many happy mothers. It is just such a handy little book as every woman ought to have. It is just what she had always wished to read—plain facts about herself. The book is mailed free to any address, write for it today.

are in evidence as the result of the preceding winter. If the areas to be improved are small, they can be hand-worked and re-seeded with little difficulty. If they are large, it is usually advisable to spade them up, work thoroughly, and seed, as in the case of starting a new lawn. In any event, re-seeding should be done early in the spring with a liberal quantity of the mixture before described.

When the stand of grass is thin over the entire lawn or a greater portion of it, a special seeder equipped with small disks has been found very satisfactory for cutting the seed into the sod and thereby producing favorable conditions for germination and subsequent growth. In the early spring, however, the soil is usually loose as a result of the freezing and thawing and is in sufficiently open condition to permit the seed to be covered with little difficulty. After seeding, if the ground has become quite dry, rolling is usually beneficial. Care should be taken when mowing or watering the newly seeded areas to avoid disturbing the young grass. This caution always applies in a measure to fall seeding, although there is not so much danger of damage in the case of the latter.

Fertilizing.

The management of the lawn after it is once established is an extremely important matter, and there are a few general practices that should be followed carefully. Beginning in the early spring, the first thing to do is to remove with a rake the top dressing that has been applied the fall before. After removing this it is usually advisable to apply some fertilizer, even though the soil is already reasonably fertile. One of the very best fertilizers for the lawn in the spring is nitrate of soda, but on account of its quick action and its caustic effect extreme caution should be used in its application. Five pounds of nitrate of soda are sufficient for 1000 square feet of lawn, and if applied in solution with the watering pot and the grass then thoroughly watered with a hose, there is little danger of scalding. Bone meal is probably the best commercial fertilizer to use on a lawn, considering the danger from the misuse of nitrate of soda. Bone meal can be used without taking any special caution in its application, as it is in no way injurious to the grass. Eight pounds to 1000 square feet is a liberal application. Any commercial fertilizer that is used should be applied early in the spring when the grass begins to grow. In fact, bone meal can be used to advantage every month during the growing season, except perhaps July and August. Fertilizing through the season is especially beneficial in keeping the grass stimulated at times when it would otherwise be more or less inactive. Pulverized limestone as a top dressing is very helpful, and an application of this substance can be made either in the fall, winter, or spring. Lime corrects the acidity of the surface soil and is useful in checking the growth of moss and various other plants that are detrimental to the grass.

BUILDING OF SHIPS BOOMING

By United Press.

Philadelphia, June 8.—Never before in the history of the United States have the ship yards along the Delaware river experienced such a rush of orders, indicative of the wave of prosperity that is surging over the entire country. The total number of vessels now being built by these yards or under contract number more than thirty, representing a cost of nearly \$100,000,000. All of the Delaware river ship yards are working at full capacity and according to reports several large corporations are preparing to place orders for more vessels.

The Cramp ship yards at present are fulfilling ten contracts. They are constructing a ten thousand ton capacity tanker for the Huasteca Petroleum company, two passenger and freight ships for the Mexican Navigation company, one passenger and freight steamship for W. R. Grace & Co., a steel yacht for Henry Whitney of New York

and five torpedo boat destroyers and some scows for the navy.

The New York Shipbuilding Co. of Camden has more work than any ship yard in the country. It holds fifteen contracts representing more than \$35,000,000. These contracts are for the super-dreadnaughts Oklahoma and Idaho, six colliers for the Coastwise Transportation company of Boston, two tankers for the Standard Oil company, one for the Petroleum Transport company, and five vessels for the navy.

The Harland & Hollingsworth company of Wilmington has two contracts for tank steamships for the Anglo-Saxon Petroleum company and Mexican Oil company. These tankers are the first orders for merchant vessels ever awarded an American ship yard by foreign owners.

In addition to these big contracts nearly every ship yard, large and small, along the Delaware river, is flooded with orders and contracts for minor work, such as barges, lighters, ferries, pleasure craft and floats. Shipping men predict that aside from the fact this year's output will be almost tripled the Delaware river plants will lead all other ship building centers throughout the world in the future.

Great Truth.

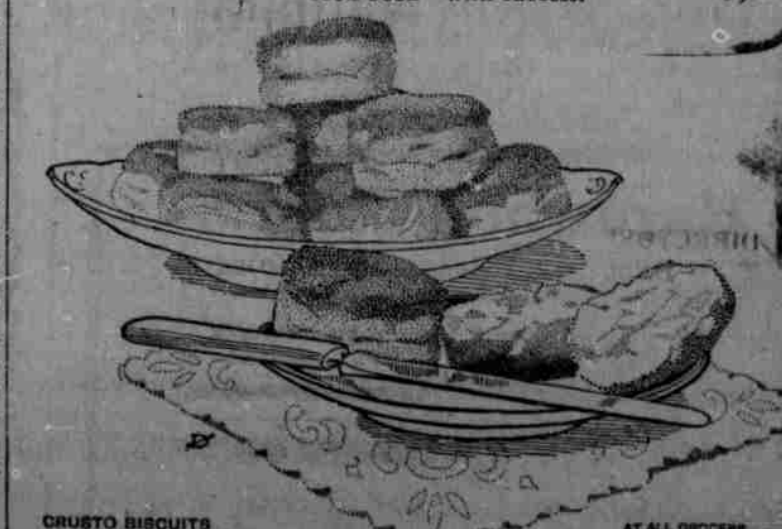

You can't make a gentleman out of a frock coat and a silk hat.

A biscuit like this—light, short (but not "greasy" short), tasting of nothing but the flour, skill and goodness you've put into it—that's what you like, isn't it? It's no miracle that makes it so good, but the know-how and crust.

A step higher than lard—at no greater cost; a price lower than cooking butter—and better for the purpose.

Eat a Crusto biscuit and you'll try Crusto from cover to cover through the cook book—with success.
